

Keeping track of changes on your SharePoint just got easy.  
Manage events on your intranet. Easy for you, easy for your users.

## Event Management

A simple way to organize events directly in your intranet. Do you use the SharePoint calendar to share dates and events with colleagues and coworkers? Enhance your intranet with the features you need.

### Events in SharePoint

The Event Management Product enhances the calendar so that you can create events that other users can sign up for. A waiting list, E-Mail notification and user rights are only some of the features offered by this Product.

### Making Events easy

- + Create and manage events in SharePoint  
How many users can attend? Start and end date?
- + Users can sign up and cancel their entry.  
No need to manually update the entry list.
- + E-mail notifications for admins and the users.  
Stay informed of the status of events at all times.
- + Easy integration into user's calendars.  
Download a vCal event file for easy integration.
- + Enhancement of the standard SharePoint calendar.

## What's New

Don't miss anything in your SharePoint with this easy to use **Web Part**. Oh so much content on your SharePoint Intranet but no overview of recent changes? This product will display all the latest changes in your intranet on any page you want.

### Flexibility that is fun to use

- + Changes and new items are indexed and displayed.  
Using the **SharePoint Search Service** guarantees great performance.
- + Configure which entries are displayed.  
Seamless integration into your intranet.
- + Detailed information on the entries is displayed.

### Keep track of changes

The What's New SharePoint product displays recently created or modified items on your SharePoint Intranet. Only see what you are interested in - with the advanced customization possibilities you can refine what type of lists are displayed.
